Dear Mr. Stenger:

On behalf of our client, Frankel Manufacturing Co. ("Frankel"), enclosed is a Generator Biennial Hazardous Waste Report and Waste Minimization Certification. In the early summer of 1985, a federal criminal action was brought against Frankel for storage of hazardous wastes without a permit. Upon becoming aware of the storage problem, and before suit was brought, Frankel performed a prompt and comprehensive cleanup and removal of wastes at Frankel's Race Court facility. Frankel later performed similar but smaller scale cleanup at property owned by Frankel at Rio Grande Boulevard. During the planning and performance of the actions, Frankel remained in close touch with both the United States Environmental Protection Agency and the Waste Management Division of the Colorado Department of Health, and submitted written statements to both agencies. Therefore, since the agencies are already aware of these one-time cleanup activities which are not representative of normal operations, they are not covered in the Report submitted today.

The documents enclosed address wastes generated by Frankel at Race Court subsequent to the one-time cleanup action, and are accurate and complete to the best of Frankel's knowledge at this time. Frankel has reviewed its procedures to ensure that the company acts as a small quantity generator in its operations, and intends to operate as a small quantity generator until further notice.

Please note that these documents address Frankel's operations in 1985 at the Race Court facility. Frankel closed its Rio Grande facility prior to 1985. Frankel assumes that the reference in the explanation to Part I of the biennial report

to wastes generated "during the 1983 calendar year" is a typographical error. Please advise us if this assumption is incorrect.

If I can be of further assistance, please do not hesitate to call on me.

Sincerely yours,

Michael J. Brennan
